Moscow, 115477, Russia
tel.: +7 495 6613563
e-mail: office@dewmark.ru
web: www.dewmark.ru

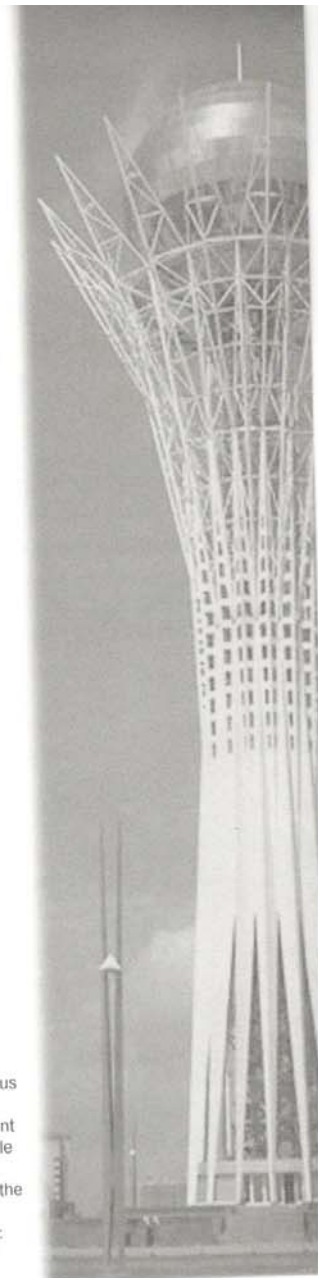

The company Dewmark specializes in the manufacture of industry-specific systems for installation and isolation of control joints of various types and loads.

Profiles for control joints are an important element of the building. They must not only ensure reliable operation, compensating for deformations and loads occurring in the building, but, as a part of the interior, should have an attractive design.

The company offers a variety of coating options:

1. The possibility to paint in any desired color according to RAL
2. To apply protective anodic coating (colored and colorless)
3. To decorate - coating providing the profiles with various wood textures.

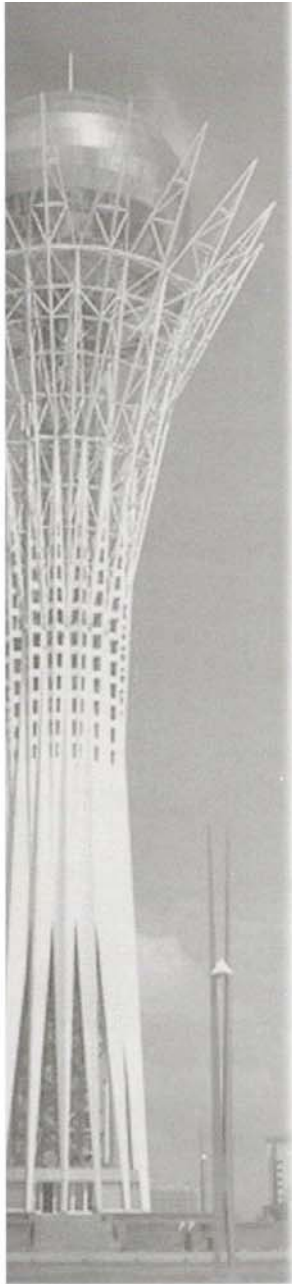

Dewmark constantly develops new profile systems and consults customers on selecting profile systems, which allow us to constantly improve and offer YOU more reliable solutions in construction.

"Trading company "Omega Mera" with the trademark Tiger in Kazakhstan, offers luxury glass products decorated with Italian technology, using the latest high-quality Italian materials: tiles, panels, kitchen wall's panels, stained glass, interior partitions, stair fencing, mirrors and many others.

Glass decorative elements in the interior - modern alternative to the traditional ceramic ones. Glass elements look great and at the same time they are hygienic, durable and easy to care of. Decorative glass elements are resistant to thermal stress, easy to clean, not afraid of moisture and can be used as in interior, either in exterior.

Moreover, glass surfaces have a very useful property: they are able visually to "move apart" the boundaries of the room, thus increasing small areas.
