STEEL PRODUCTS DISTRIBUTION DIVISION

We strive to find solutions based on your needs: from stock or new production, with additional mechanical or NDE testing and certifications, with transport, insurance, financing and warranty, regardless of the order size, grade, quantity, dimensions or additional requirements. In our service center or at our suppliers, we can cut to size, bend, process, protect, pack or store the products before delivery.

MANUFACTURING DIVISION

We manufacture a wide range of products starting from simple civil structures to high pressure equipment for petrochemical or power industry or components for the medical industry.

Our new investments in our fabrication lines include automatic welding and cutting equipment, 3 and 4 cylinder rolling machines and new controlled rooms for blasting and painting. We have verified sub-suppliers to assist us in the operations that are above our range of expertise, equipment or size.
